- Context management : Zustand, React Context, Redux saga, Redux Toolkit (Beginner)

## Other Project

---

### • Company Profile Fortuna Teknik mandiri

Fortuna teknik mandiri (<https://fortuna-teknik-mandiri.vercel.app>)

Fortuna Teknik Mandiri is a furniture manufacturing company specializing in custom-made furniture for residential, commercial, and industrial needs. This company profile website was developed to present the company's identity, showcase its product portfolio, highlight production capabilities, and provide clear information about services and contact details in a professional and modern layout.

### • Selaras Invitation

Selaras Invitation (<https://selarasinvite.vercel.app>) is a web-based digital invitation platform that I independently developed using Next.js as the frontend framework. The application uses a monolithic architecture with built-in Next.js backend services, Supabase as the database, and Prisma ORM for database management and connection handling.

### • Jvalleyverse

Jvalleyverse (<https://jvalleyverse.vercel.app>

) is a personal online course project designed as a free learning platform for web development, covering topics from beginner to advanced levels. The website is built using React.js with Vite, utilizes Supabase for backend services, and is deployed on Vercel.

### • Tani Deals App (<https://www.figma.com/proto/vV1zYKypYPe8bBS5mWyyP8/Tani-Deals-App-UI?node-id=11-24&node-type=canvas&t=wT27RpcZRXb6E2YY-0&scaling=scale-down&content-scaling=fixed&page-id=0%3A1&starting-point-node-id=75%3A2029>)

Tani Deals App is a personal project showcased during the Jvalley Bootcamp, featuring a Figma prototype design for a marketplace focused on buying, selling, and renting agricultural equipment, aimed at supporting innovative agricultural solutions.
